Objective

Experienced ReactNative Developer with 4 years of expertise in Multiplatform Front End Development using React, delivering scalable and high-performing applications for web and mobile platforms.Skilled in designing, coding, and enhancing application components using modern JavaScript frameworks, responsive UI principles, and Agile methodologies.Strong ability to interpret functional and technical requirements and translate them into robust, component-driven architectures aligned with business goals.

Experience

- **Infocure Technologies [Contract]** **Dec 2025 - Present**
  Client – ReSustainability Limited
  Senior Application Developer
  - Developed a cross-platform mobile application using React Native, enabling seamless performance on both Android and iOS devices.
  - Integrated Google Maps API for real-time location tracking, navigation, and service discovery features. Implemented
  - OTP-based authentication to ensure secure user login and account verification.
  - Designed and developed role-based access control for Customer and Provider modules with customized functionalities.
  - Built and managed push notification system to enhance user engagement and provide real-time updates.

- **Cresol Infoserv** **May 2025 - Nov 2025**
  Senior Software Developer
  - Built responsive and intuitive UI screens by applying modern design principles and translating UX wireframes into functional components.
  - Integrated RESTful APIs for dynamic content flows, enhancing interactivity and overall user experience.
  - Ensured component-level performance optimization, smooth navigation, and efficient API handling across platforms.
  - Managed application releases for Android and iOS, ensuring compliance with app store guidelines and high-performing production builds.
  - Enhanced and modernized UI components using ReactJs improving usability, accessibility, and scalability across devices.

- **Naarsoft Tech Private limited** **Aug 2024 - May 2025**
  Software Engineer
  - Independently delivered features and resolved UI/UX issues by debugging, optimizing performance, and ensuring smooth cross-platform compatibility.
  - Collaborated with designers, backend developers, QA teams, and product owners to align deliverables with business and technical requirements.
  - Assisted in technology evaluation and contributed recommendations to enhance overall project efficiency and maintainability.
  - Demonstrated SME-level ownership by resolving complex UI issues, improving component functionality, and enhancing system-wide performance.

- **KIMS HOSPITALS** **Sep 2023 - June 2024**
  Software Engineer
  - Configured and optimized Expo build pipelines for smooth application bundling and deployment processes.
  - Implemented responsive design principles to ensure optimal user experiences across devices and screen sizes.
  - Integrated real-time functionalities using WebSockets and REST APIs for dynamic data updates in apps.
  - Collaborated with design teams to translate wireframes and UI designs into functional mobile and web applications.
  - Utilized Expo's EAS Build for generating platform-specific binaries, including APKs and IPAs, with minimal manual intervention.

- **Treosoft IT Solutions** **June 2022 - Aug 2023**
  [Client : KIMS HOSPITALS]
  Junior Software Engineer
  - Developed and maintained responsive web applications using ReactJS, ensuring high performance and cross- browser compatibility.
  - Integrated RESTful APIs to enable dynamic data fetching and seamless communication between frontend and backend systems.
  - Built reusable and modular UI components using React to standardize development and improve maintainability.

- Enhanced user experience by implementing interactive features and responsive layouts with HTML5, CSS3, and JavaScript (ES6).
- Utilized Git for version control, performing regular tasks such as git pull, git push, branching, and merging for efficient code collaboration.

Skills

- **Languages & Frameworks:** HTML, CSS, JavaScript, React.js, ReactNative, Typescript
- **Back-end Technologies:** Nodejs
- **Mobile Development:** React Native,
- Android SDK, iOS Xcode
- **Version Control:** Git, GitHub/GitLab
- **Cloud Technologies**: (Firebase,AWS, Google Cloud Console)
- API Development, Payment Gateways, Implemented Notifications
- **Deployment Platforms:** PlayStore, AppStore

Projects

- **ReCollect**
  - Developed a cross-platform mobile application using React Native for both Android and iOS platforms.
  - Implemented Google Maps integration to enable location-based services such as tracking, navigation, and nearby service discovery.
  - Designed and built role-based modules for Customer and Service Provider, ensuring customized user experiences and workflows.
  - Developed secure OTP-based authentication system for user registration and login verification.
  - Integrated push notifications to provide real-time alerts, updates, and service confirmations to users.
  - Connected frontend with RESTful APIs for dynamic data handling, user management, and service requests.

- **Mentor Web**
  - Developed custom software components using React and modern frontend technologies, ensuring high code quality and adherence to scalable architecture principles.
  - Built responsive and user-centric interfaces by applying HTML5, CSS3, and JavaScript along with best UX/UI practices.
  - Integrated REST APIs and third-party services to enable dynamic data exchange and seamless functionality across systems.
  - Actively participated in discussions related to architecture, design, and requirement analysis, contributing technical insights and solutions to team challenges.
  - Managed multiplatform development using React and React Native, ensuring consistent performance and visual accuracy across web and mobile environments.

- **AnantJeevan**
  - Contributed to the development of Anantjeevan, a counselling app focused on improving mental wellness by providing quick mental health assessments and professional support.
  - Designed and implemented features for users to check their mental health status within minutes through an interactive interface.
  - Developed functionalities for booking appointments with counselors and real-time chat support to assist users struggling with mental health issues.
  - Integrated RESTful APIs to fetch dynamic content, manage appointment schedules, and handle user interactions seamlessly.

- **GlocalPrayer Network**
  - Redesigned and enhanced the user interface of the Glocal App, aligning it with modern design principles to improve usability and aesthetics.
  - Implemented responsive UI components for better accessibility and a seamless experience across devices.
  - Worked closely with backend teams to integrate dynamic content such as prayer requests, songs, and Bible study resources through RESTful APIs.
  - Collaborated on API design and data flow optimization, ensuring efficient communication between frontend and backend systems.
  - Improved user experience by refining navigation and incorporating interactive features like notifications, event updates, and multilingual song libraries.

- **Operational Theatre Management (OTM)**
  - Independently delivered features and resolved UI/UX issues by debugging, optimizing performance, and ensuring smooth cross-platform compatibility.
  - Collaborated with designers, backend developers, QA teams, and product owners to align deliverables with business and technical requirements.
  - Assisted in technology evaluation and contributed recommendations to enhance overall project efficiency and

maintainability.
    - Demonstrated SME-level ownership by resolving complex UI issues, improving component functionality, and enhancing system-wide performance.
- **Financial Counselling (FC)**
    - Utilized React Js to develop the frontend components and userface.
    - Collaborated with backend developers to integrate frontend with RESTful APIs for seamless data exchange.
    - Collaborated with backend developers to design and implement APIs for fetching historical dataand serving predictive analytics results to the frontend.

- **MYKIMS**
    - Implemented mobile application using React Native framework for Android platform.
    - Worked closely with UI/UX designer to translate the design specifications into interactive and visually appealing user interfaces.
    - Utilized React Navigation,React-native components and native base components.
    - Optimised application performance for mobile devices,ensuring smooth animations and responsiveness.

Achievements & Awards

- Successfully deployed 5+ production mobile applications to Play Store and App Store. Improved app performance through optimized rendering and caching strategies. Performed Internal Testing under Production phase. Implemented automated build pipelines reducing manual deployment time.

Education

- **MallaReddy University** **2025 - 2027**
  Master of Technology - Machine Learning & Deep Learning
- **Jawaharlal Nehru Technological University - Anantapur** **2018 - 2022**
  Bachelor of Technology - Electrical and Electronics Engineering
  7.5
